

Senior Software Developer

Location:	South Bend, IN	FLSA Status:	Full-Time (Exempt)
Department:	Development	Education Level:	Bachelor's or equivalent
Reports To:	VP, Program Management and Development	Revision Date:	January 3, 2017

Company Description:

Harmony Healthcare IT provides technology solutions for healthcare organizations by safeguarding protected clinical information, increasing productivity and maximizing cash flow. We specialize solely in healthcare technology – driving accessibility, security, efficiency and quality for our customers who rely on accurate clinical data to provide care for their patients. We are best known for our excellence in data extraction, migration and retention of healthcare records ensuring system reliability and data integrity 24/7. We are growing and seek to add key members to our team to help continue our mission of helping the healthcare system work better for everyone.

Position Summary:

As healthcare organizations implement electronic health records (EHR), they have an opportunity to decommission legacy systems that the new software replaced. This allows for the HIPAA-compliant, long-term storage of protected health information (PHI). We provide solutions for acute and ambulatory healthcare organizations to archive legacy systems. **The Senior Software Developer** plays a critical role in working with our team to develop these customized solutions for our customers. We are looking for a rock-star who can lead us in cutting edge development for our customers.

Primary Responsibilities:

- Lead us in cutting edge development enviro's, first and foremost, Angular JS (java script), but also Java, Hibernate, Liquibase.
- Serve as SME and help team move towards goals and benchmarks.
- Perform complex design activities on software applications and research software problems discovered throughout design process.
- Serve as mentor, providing guidance to development staff.
- Review system specification documents and develop repeatable materials to be used during the level of effort and solution engineering phases of the project life cycle.
- Review code and implementation to achieve high quality work product.

Required Qualifications:

- 5+ years of experience working in software development and currently working in the latest technology stack. We will consider less work experience for a wizard!
- Experience working in an agile/scrum-based development environment
- Programming Skills: Java, C
- Web Development: **Angular JS is a must**, Java Servlets, Java Script, HTML
- Databases: PostgreSQL, MSSQL

Attributes We Want You to Have:

- A desire to work and lead in a fast-paced nimble environment
- A roll-up-your-sleeves and get-it-done work ethic that doesn't quit
- Strong interpersonal skills for effective communications with internal team members
- A desire to serve as a mentor to our growing team!
