<b>Location:</b>	South Bend, IN	<b>FLSA Status:</b>	1099 Contract
<b>Department:</b>	Development	<b>Education Level:</b>	Some college credit
<b>Reports To:</b>	VP, Program Management and Development	<b>Revision Date:</b>	January 22, 2017

### Company Description:

Harmony Healthcare IT provides technology solutions for healthcare organizations by safeguarding protected clinical information, increasing productivity and maximizing cash flow. We specialize solely in healthcare technology – driving accessibility, security, efficiency and quality for our customers who rely on accurate clinical data to provide care for their patients. We are best known for our excellence in data extraction, migration and retention of healthcare records ensuring system reliability and data integrity 24/7. We are growing and seek to add key members to our team to help continue our mission of helping the healthcare system work better for everyone.

### Position Summary:

As healthcare organizations implement electronic health records (EHR), they have an opportunity to decommission legacy systems that the new software replaced. This allows for the HIPAA-compliant, long-term storage of protected health information (PHI). We provide solutions for acute and ambulatory healthcare organizations to archive legacy systems. **The Software Development Intern** will have an opportunity to get frontline experience as a member of our development and will get an intimate look at our product as well as the development process we use to solve for our customers' data challenges.

### Primary Responsibilities:

- Assist development team in performing software design activities on software applications and researching software problems discovered throughout design process.
- Assist in the review of system specification documents and the development of repeatable materials to be used during the level of effort and solution engineering phases of the project life cycle.
- Assist in reviewing code and the implementation process.

### Required Qualifications:

- Currently enrolled in an undergraduate program in computer science, information technology, or informatics.
- A desire to make a career as a programmer.
- Curiosity for cutting edge development enviro's, first and foremost, Angular JS (java script), but also Java, Hibernate, Liquibase
- Experience or classroom exposure to working in an agile/scrum-based development environment
- Programming Skills: Java, C
- Web Development: **Angular JS is a must**, Java Servlets, Java Script, HTML
- Databases: PostgreSQL, MSSQL
